A&A Datalink, Inc.

A&A Datalink, Inc. is a family owned and operated lead generation company that has specialized in providing pre-qualified leads to health insurance agents for the past 10 years.

Founded in 1997, A&A Datalink has catered to the needs of their clients and has led the way in telephone generated, self-employed health insurance sales leads.

A&A Datalink is your complete solution for sales leads.

What our clients have to say....

- “I’ve been using A&A for the past 3 years and they have played a key role in the growth and success of my office. I would recommend them to any insurance marketing company, independent agent, or brokerage that would like to increase their sales volume.” *-Joe M., Health Markets, Fresno, CA*
- “As a sales force leader, I’ve used A&A Datalink since 2000, and the quality and performance of the leads have kept me and my sales force coming back. Not only is the quality strong, but the professionalism and responsiveness of the staff and the owners, exemplifies what customer service is all about. *-Kathy M., Affordable Business Management Solutions, In.c, Walpole, MA*
- “I have been purchasing leads from AA Datalink for the past two and a half years. [I have] found them to be superior to any other leads provided by vendors outside of Affordable Business Management Solutions, Inc. In the past 30 months, I have purchased leads from a variety of internet providers and telemarketing providers, and none have been as effective as the leads from AA Datalink. The people at AA Datalink have been very responsive to my division’s needs in target marketing to strategic zip codes in the Greater Chicago Metropolitan area. Additionally, AA Datalink delivers our orders in a timely fashion and never lets us down. I would recommend the services of AA Datalink to everyone in the Affordable Business Management Solutions family. Monty and Amanda won’t let you down!” *Jerry P., Chicago, IL*
- “Of all the leads we get, our agents find yours the most productive. [The agents] can always get hold of the person. That is a major help [because with] so many of the leads, you can never get the person: phone number disconnected, wrong number or person, a fax rather than a phone, etc. Your leads have the best contact rate - we can talk to them. The other major advantage is that they remember being contacted - it helps break the ice. All of this leads to a greater chance for a sale. If things go wrong, you always fix them and you always give credit for the few “bogus-type” leads. I also like the way you screen medical conditions. We have always done well with the leads we invested with you. Thank you very much.” *W. Noll, Pasadena, CA*
